

Pom Pom Pollinator

Materials:

- 2 large pom poms
- 2 googly eyes
- toothpick
- cupcake liner
- black marker
- glue
- scissors

Directions:

1. Use the marker to color the toothpick black and then cut the toothpick in half.
2. Glue the pom poms together.
3. Cut the cupcake liner into four equal pieces and discard one. Fold the pointed corners so you have tabs to glue to the pollinator.
4. Glue the cut end of the toothpick and stick it into the pom pom. Glue the googly eyes just above to create the pollinator's face.
Glue two pieces of the cupcake liner to the sides of the other pom pom to be wings and glue the last piece on the end of the pom pom to create the tail.
5. Allow all glue to completely dry!
