

Make a Seagull Craft

Materials:

paper plate
orange construction paper
black marker or crayon
pencil
scissors and glue stick

Instructions:

1. Using the pencil, trace a seagull head/neck shape from one edge of the plate to the center of the plate.

2. Cut the pencil lines, leaving the plate intact at the bottom of the neck.

3. Fold down the sides to make wings.

4. Cut out feet and a beak from the orange paper.

5. Glue the beak to the head of the seagull and the feet onto the back of the plate on the bottom.

6. Using the marker or crayon, draw eyes and add some black around the edges of the wings or head – however you want your seagull to look!
